

SYPHILIS IS BACK

A SURGE IN SYPHILIS CASES HAVE BEEN DIAGNOSED IN THE SOUTH WEST

Syphilis can be transmitted through all types of sexual contact. This includes oral sex and shared toys.

Syphilis can also be passed on to your baby during pregnancy. You will have been tested for syphilis at your booking visit but if you have changed partners since or get symptoms, you need to re-test.

Not everyone who has syphilis has symptoms. To see options for testing go to:
